

## Attention New York Part B Electronic Claim Submitters - Edit Implementation February 10, 2005

Due to a system release by our shared maintainer, an additional edit will be implemented **February 10, 2005**. Changes are made on an as-needed basis. As these changes are made, modifications are also made to the Claim Specific Edit document that is found in the Companion Document. Please check our Web site <http://www.empiremedicare.com/omnipro/pdf/TPA837-NY.pdf> for these updates.

This edit will not allow a 2000A PRV segment (billing provider taxonomy code) with a 2310B loop (Rendering provider name). If 2310B loop is present, do not use the 2000A PRV segment. *ZOLL Data Systems is up to date on this edit. Our software does not output both loops. Your data file will always output Loop 2000A if you are not outputting a Provider Site ID or a Group Provider ID. If the latter were provided in the file then Loop 2000A would be omitted. The short of it: no changes are necessary on our part.*

*New Edit has been added.*

**Edit 11320 – 2310B, 2000A SENT-PRV REQD AT 2310B ONLY:**

| PRV | Billing Provider Specialty Information | 2000A |   |       |   |
|-----|--|-------|---|-------|---|
|     |  |       | 2000A PRV segment not allowed with 2310B PRV segment. If 2310B loop present, do not use this segment. | 11320 | 2310B,2000A,SENT-PRV REQD AT 2310B ONLY |

### **IMPORTANT**

**\*Please be aware that many submitters are sending a Social Security Number (SSN) in the subscriber loop. This is not valid, according to the Implementation Guide (IG), for Medicare. We will be editing for this information in the near future, and if the SSN is present in the 2010BA loop, your claim will reject in front-end processing. *Always make sure that the Medicare recipient's ID contain an Alpha character.***
