

Education & Training

Microsoft SQL 2005 Administration

ZOLL Data Systems is offering a Microsoft SQL 2005 Administration training course to RescueNet users interested in pursuing a greater depth of understanding of MS SQL 2005 and how Rescuenet databases are implemented.

Class Description

This 5-day course provides students with the knowledge and skills to maintain a Microsoft SQL Server 2005 database. The course focuses on teaching individuals how to use SQL Server 2005 product features and tools related to maintaining RescueNet databases. After completing this course, students will be able to:

- Manage database files.
- Backup and restore databases.
- Manage security.
- Monitor SQL Server.
- Transfer data into and out of SQL Server.
- Automate administrative tasks.
- Replicate data between SQL Server instances.
- Maintain high availability.

Audience

- RescueNet and database administrators

Prerequisites

- Working knowledge of Windows and Windows-based applications.

- Intermediate to advanced knowledge of database concepts such as tables, fields and records is highly recommended.
