5 Ways ZOLL® AR Boost® Tools Can Find Active, Billable Coverage for More Than 30% OF CLAIMS

1 Demographic Information

- Improves demographics for up to 60% of patients
- More complete demographic data yields better insurance discovery results

2 Coverage Details

- Differentiates between managed care and advantage plans
- Lists relevant plan types (HMO, PPO, etc.)

3 MBI Discovery

- Uses our proprietary algorithm to find MBIs when one isn't available
- Convert a HICN or SSN to MBI

4 Multiple Data Sources To Find the Best Results

- Searches several sources to find active coverage
- Searches non-standard eligibility sources to enhance results

5 Customizable Workflows Enable Users To:

- Build exclusions to eliminate false coverages
- Create rules based on facility, patient, state, and payer
