# ZOLL®

ZOLL CARE EXCHANGE

57% of critically ill patients arrive at healthcare facilities via EMS transport.

These patients incur 40% LONGER in-patient stays

...and have 45% HIGHER in-patient costs

ZOLL can help you collaborate with your EMS partners to:

- Improve patient outcomes
- Minimize safety and compliance risks
- Reduce costs
- Achieve your Quadruple Aim goals

Bi-Directional Pre-Hospital Exchange

- One data channel for all your EMS partners, regardless of which charting product they use

- Automatically sends EMS data to the patient chart, with no human intervention

- Discrete data, documentation, EKGs, and images

- Interoperable with all major EMRs and standards: HL7, CCD, FHIR

- Interoperable with all major EMS charting products and standards (NEMSIS)

CONNECTING TO PRE-HOSPITAL DATA

Accurate and timely exchange of EMS data makes a significant difference in patient outcomes. Proper communication of onset times, procedures, medications, and assessment data availability is crucial for improved patient outcomes.

ZOLL Care Exchange enables seamless, near real-time data flow between EMS software from multiple vendors and Hospital EHRs.

You can hire the right staff with the right skillset and simplify your systems — especially if you use a cloud-based solution. But if you don't know what problem you're solving to begin with, then that's the most immediate thing and the biggest problem facing your agency.

Improve Patient Outcomes

- Timely access to EMS data, documents, EKGs and images

- Clinician access from the patient chart

- Improved transparency to pre-hospital records

- Reduce door to treatment times

- Automated follow-up for EMS and fire department clinical quality improvement

Simplify Safety & Compliance

- Transparency to pre-hospital care
- HIPAA compliant
- Fulfills JCAHO ePCR compliance requirement

Reduce Costs

- Eliminates manual data entry, faxing, scanning and searching
- Reduces effort of EMS follow-up
- Re-allocates staff to higher value tasks

Collaborate with your EMS Partners

- Share patient and payor information
- Provide clinical follow up for quality improvement
- Better data and tools for compliance staff (trauma, stroke and STEMI)
- Re-focus staff on improving patient care

Mature & Proven Solution

- For all facilities and departments
- For all EMS partners
- Cost-effective implementation process
- No barcode scanners or wrist bands required
- Secure and SOC-2 compliant
