ZOLL®

Your Data, Your Tools, Your Choice: Power Your Insights

Direct Data Access

DATA SHEET

Direct Data Access for ZOLL cloud-based EMS software gives customers flexibility and control to access, manipulate, and analyze their data using the platform of their choice.

EMS agencies need direct access to their dispatch, ePCR, and billing data to analyze and manipulate it and help drive better financial, operational, and clinical decisions. Direct Data Access for ZOLL cloud-based EMS software gives customers the flexibility and control needed to access, manipulate, and analyze combined data from ZOLL and third-party sources, using customers' own analytics platform and extraction strategy.

Benefits

- ZOLL Billing and ZOLL Dispatch customers can easily access, manipulate, and analyze combined data directly from their ZOLL software

- Customers have the flexibility and control to access, manipulate, and analyze their own data outside of their software, using the tools and platforms they prefer

Capabilities

- Accessible through third-party analytics platforms via Snowflake

- Data can be extracted on a scheduled basis (for data warehouse owners)
