

RescueNet Billing Solutions

Work Smarter to Drive More Revenue

Reimbursement for services is the lifeblood of your organization, which means you need to work smarter not harder. Our RescueNet Billing solutions help identify and address issues that can delay reimbursement, automate the payment process, and prioritize workload so you can drive more revenue.

Realize the Greatest ROI

Leverage billing automation to help get paid on time. Our RescueNet Billing solutions monitor claims for errors and reduce receivable turnaround times to help maximize your cash flow. Integration with RescueNet Dispatch and RescueNet ePCR make patient data taken from call takers, dispatchers and field staff is immediately available to your billers. This eliminates time-consuming and error-prone duplicate data entry.

Improve Efficiency & Expedite the Claims Process

- Start the billing process as soon as the patient record is complete through PCR integration
- Configure workflows to prioritize and organize tasks for billing staff
- Workflows identify problem areas in your A/R and links billers to the problem area
- Process payments as a batch with one step
- Automate your billing cycles, and let the system ensure timely invoices/claims

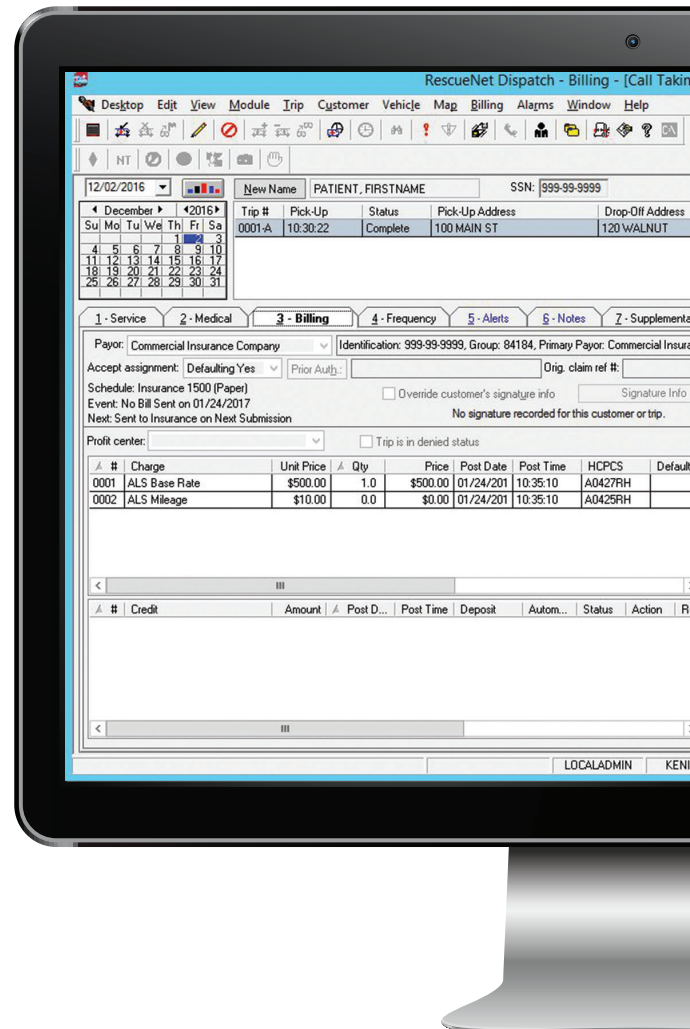

Optimize Payment Revenue

- Claims are double checked during batch processing to reduce the possibility of denials
- Complete, validated data maximizes billing reimbursement
- Processing claims daily expedites the claim processing and submission process
- Check insurance eligibility by clicking one button; no more phone calls

Navigate Industry Compliance Changes Now & in the Future

Stay informed and make sure you are ready for changes in guidelines and regulations before they happen. With ZOLL as a partner, you can rest easy knowing that guidelines and compliance standards like:

- Medicare
- NEMSIS
