

# Automated or Manual Prior Authorization

## WHAT'S RIGHT FOR YOU?

Up-front, manual revenue cycle processes are time consuming, error prone, and lead to payment leakage. With automation, the process from order through prior authorization (PA) can free up staff to focus on the higher-value activities, provide price transparency to providers and patients, and reduce turnaround time. So which path is right for your organization?

From the provider's orders to prior authorization adjudication, the path is clear. With automation, you can improve collections and reduce labor-intensive tasks, improving both staff efficiency and the patient's financial experience.

### About ZOLL® AR Boost®

ZOLL AR Boost is a real-time accounts receivable solution suite that simplifies and expedites the pre-billing process. It delivers accurate, actionable data to reveal hidden coverage and drive self-pay and high-deductible conversions.
