

# Confirm Eligibility and Benefits in Real Time

## ZOLL AR Boost® Insurance Verifier

### DATA SHEET

The ZOLL® AR Boost® Insurance Verifier tool combines innovative technology with receivables expertise to rapidly and accurately get the information needed for optimum reimbursement faster.

Our Insurance Verifier tool assesses insurance coverage, co-pays, deductibles, secondary coverage, and codes. Users can configure the tool via API integration for maximum effectiveness. Improved reimbursement is achieved by providing billing teams with service type, co-pay, deductibles, and benefits. No more need to go to multiple websites to run eligibility transactions — the information needed is consolidated in to a single point of access. Billing teams spend less time on verification and get the information they need faster. Moreover, our tool can be easily integrated into existing workflows via API options.

### Features

#### Redundancy

- Multiple layers of clearinghouse redundancy
- Manages payer unresponsiveness automatically

#### Dynamic Payer Routing

- Routes transactions to a different payer for an insurance verification transaction based on the prefix of the subscriber ID
- Routes the transaction to the correct payer based on the prefix of the subscriber ID and returns the coverage benefits

### Benefits

- Higher clean claim rates
- Fewer claim rejections and payment delays
- Up-front coverage determinations
- Real-time capture of benefits and eligibility

### Configurable Settings

- Real-time options to:
  - Run transaction for Medicare replacement payer
  - Run transaction for managed care plan
  - Run patient state Medicaid when CMS QMB plan identified

# Explore All of the ZOLL AR Boost Tools

## Demographic Verification

The ZOLL AR Boost Demographic Verifier tool enhances core demographics on more than 82% of patient claims, on average.

- Scours databases for information, correcting and replacing faulty or missing data for 60% or more encounters in real time
- Reduce returned mail by 60%
- The only demographic verification tool that provides a confidence score based on our proprietary 108-point algorithm, designed exclusively for the medical practice environment

## Insurance Discovery

The ZOLL AR Boost Insurance Discovery tool finds active, billable healthcare coverage in real time for more than 40% of claims.

- Reduce write-off losses by identifying retroactive Medicaid eligibility for up to 5% of uninsured patients
- Discover 20% more commercial coverage
- Discover up to 17% more government coverage
- The only insurance discovery tool that delivers a confidence score based on our proprietary, 108-point algorithm

## Third-party Liability Discovery

The ZOLL AR Boost Third-party Liability Discovery tool utilizes automation to identify additional coverage and capture higher-value payments quickly, without patient outreach.

- Captures up to 40% higher reimbursement than standard medical coverage
- Automatically finds up to 300% more overlooked third-party liability coverage

## Prior Authorization

ZOLL AR Boost Prior Authorization is a centralized, AI-enhanced tool that helps streamline workflows, preserve revenue, and improve the patient experience.

## Deductible Monitoring

The ZOLL AR Boost Deductible Monitoring tool provides real-time intelligence that empowers billing professionals to time claim submission for proper reimbursement.

## Self-pay Analysis

The ZOLL AR Boost Self-pay Analyzer tool automatically helps improve self-pay revenue capture.

- Improves self-pay collection rate by more than 30% while supporting personalized financial options that improve patient satisfaction

## Claim Status

The ZOLL AR Boost Claim Status tool runs real-time claim status checks to help billing professionals work claims sooner to reduce denials, rejections, and time to collect.

## MBI Lookup

The ZOLL AR Boost MBI Lookup tool quickly and automatically identifies and converts an individual HICN or SSN to Medicare Beneficiary Identifier (MBI) to help facilitate clean claims and optimum reimbursement.

## Medicaid Redetermination

ZOLL AR Boost Medicaid Redetermination tools make it easy to verify demographics and determine eligibility in real time to help ensure continuous coverage.

- Provides a confidence score based on our proprietary 108-point algorithm, designed exclusively for healthcare

## Retroactive Medicaid

The ZOLL AR Boost Retroactive Medicaid Status tool helps reduce the number of self-pay accounts by automatically monitoring eligible claims for active Medicaid coverage status and releasing them for submission when coverage is found.

## API Integration Options

- Integrate the entire solution suite or individual tools into scheduling, patient engagement, billing, or any stage of your practice management or healthcare technology platform
- Choose standard API integration for seamless access to our tools from within your offering
- Choose our API with a pre-built user interface (UI) for rapid implementation and minimal developer demands
- Enjoy technical support and comprehensive developer resources to assist with implementation
