

Improve Self-pay Revenue Capture With Insight Into Each Patient's Unique Financial Characteristics

ZOLL AR Boost® Self-pay Analyzer

DATA SHEET

Our ZOLL® AR Boost® Self-pay Analyzer tool can improve your self-pay conversion rate by more than 30% while supporting personalized financial options that help increase patient satisfaction.

The ZOLL AR Boost Self-pay Analyzer tool automatically groups self-pay receivables by propensity to pay and reveals those who are eligible for charitable or prompt-pay discounts. Our tool enables you to partner with patients on financials and offer customized payment plans. It helps prevent unnecessary outsourcing to collections, instead capturing maximum revenue through a transparent, collaborative approach that treats each patient individually, enhancing their overall experience. Moreover, our RCM optimization tools can be easily integrated into existing workflows via API options.

Benefits

- Improves cost-to-collect ratios
- Improves self-pay conversion rate by more than 30%
- Enables collaboration with patient for a personalized financial experience
- Supports compliant discounting under price transparency rules
- Reduces agency contingency fees
- Improves patient satisfaction with the financial process

Features

- Insight into each patient's unique financial characteristics, including available credit
- Federal Poverty Level provided to assist in determining hardship or charity care eligibility
- Various income and credit indicators
- Community-based credit information available when credit information for individual patient is not

Configurable Settings

- Propensity-to-pay thresholds
- Workflows based on specified income and credit indicators

Explore All of the ZOLL AR Boost Tools

Demographic Verification

The ZOLL AR Boost Demographic Verifier tool enhances core demographics on more than 82% of patient claims, on average.

- Scours databases for information, correcting and replacing faulty or missing data for 60% or more encounters in real time
- Reduce returned mail by 60%
- The only demographic verification tool that provides a confidence score based on our proprietary 108-point algorithm, designed exclusively for the medical practice environment

Insurance Discovery

The ZOLL AR Boost Insurance Discovery tool finds active, billable healthcare coverage in real time for more than 40% of claims.

- Reduce write-off losses by identifying retroactive Medicaid eligibility for up to 5% of uninsured patients
- Discover 20% more commercial coverage
- Discover up to 17% more government coverage
- The only insurance discovery tool that delivers a confidence score based on our proprietary, 108-point algorithm

Insurance Verification

The ZOLL AR Boost Insurance Verifier tool combines innovative technology with receivables expertise to confirm eligibility and benefits in real time.

Third-party Liability Discovery

The ZOLL AR Boost Third-party Liability Discovery tool utilizes automation to identify additional coverage and capture higher-value payments quickly, without patient outreach.

- Captures up to 40% higher reimbursement than standard medical coverage
- Automatically finds up to 300% more overlooked third-party liability coverage

Prior Authorization

ZOLL AR Boost Prior Authorization is a centralized, AI-enhanced tool that helps streamline workflows, preserve revenue, and improve the patient experience.

Deductible Monitoring

The ZOLL AR Boost Deductible Monitoring tool provides real-time intelligence that empowers billing professionals to time claim submission for proper reimbursement.

Claim Status

The ZOLL AR Boost Claim Status tool runs real-time claim status checks to help billing professionals work claims sooner to reduce denials, rejections, and time to collect.

MBI Lookup

The ZOLL AR Boost MBI Lookup tool quickly and automatically identifies and converts an individual HICN or SSN to Medicare Beneficiary Identifier (MBI) to help facilitate clean claims and optimum reimbursement.

Medicaid Redetermination

ZOLL AR Boost Medicaid Redetermination tools make it easy to verify demographics and determine eligibility in real time to help ensure continuous coverage.

- Provides a confidence score based on our proprietary 108-point algorithm, designed exclusively for healthcare

Retroactive Medicaid

The ZOLL AR Boost Retroactive Medicaid Status tool helps reduce the number of self-pay accounts by automatically monitoring eligible claims for active Medicaid coverage status and releasing them for submission when coverage is found.

API Integration Options

- Integrate the entire solution suite or individual tools into scheduling, patient engagement, billing, or any stage of your practice management or healthcare technology platform
- Choose standard API integration for seamless access to our tools from within your offering
- Choose our API with a pre-built user interface (UI) for rapid implementation and minimal developer demands
- Enjoy technical support and comprehensive developer resources to assist with implementation
