

Automate patient statement generation and payment processing

ZOLL® Billing Patient Statement and Payment Portal SOLUTION OVERVIEW

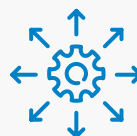

The ZOLL Billing patient statement and payment portal automates paperless statement generation and credit card processing to reduce manual effort, help improve timely payments, and enhance cash flow predictability.

Manually preparing and mailing individual patient statements and processing patient payments requires considerable staff resources that would be better spent on higher-value activities.

The ZOLL Billing Patient Statement and Payment Portal integrates and automates paperless patient statements and online payment processing within a single solution. Billers can choose a vendor directly through ZOLL Billing that will generate and mail billing statements on their agency's behalf and enable online credit card payments, increasing the likelihood of timely payment. Agencies can also keep track of claims by status through the portal, helping to predict cash flow more accurately.

No more folding and stuffing envelopes: billing staff is now free to focus on more pressing tasks like claims processing and follow up.

Capabilities

- Automates paperless statement generation and credit card processing

Key features

- Paperless patient statements
- Built-in credit card payment processing
- Submits statements nightly during off-hours

Benefits

- Centralizes billing, patient statements, and online payment processing in a single solution
- Saves time by eliminating tasks and automatically generating paperless statements
- Helps predict cash flow by tracking claim status
- Increases the likelihood of timely payment by enabling online credit card payment
- Frees up billing staff to focus on higher-value work
- Gives agencies choice of vendors to better align with their business requirements

Patient statement and payment processing vendors

Two patient statement and payment processing vendors, PayGround and Waystar, are available. Agencies can review each vendor's capabilities to determine which one is the best fit.
