

Improve outcomes at every stage of EMS operations

Acute care devices, software, and data solutions

Customer-driven products designed in one seamless environment to help you:

- operate more effectively
- to help you save more lives
- capture more revenue

ZOLL® offers your agency a full complement of acute care devices, software, and data solutions that can help you improve clinical, operational, and financial performance—during dispatch, patient care, QA/QI, billing, and beyond.

Communications

ZOLL Dispatch is the intelligent call-taking and computer-aided solution that lets you respond quickly and communicate effectively. When combined with the **ZOLL Respond™** mobile companion app, dispatchers and crews can voicelessly communicate important patient and scene information.

Patient Care

The **X Series® Advanced** monitor/defibrillator features Real BVM Help®, technology that delivers real-time clinical feedback on manual ventilation. It also supports your most critical patients with trending physiological data on the TBI Dashboard™.

The **AutoPulse® NXT Resuscitation System** lets your team quickly begin automated, customized compressions that continue through treatment and transport.

Patient Charting

ZOLL emsCharts® is a proven, cloud-based ePCR solution that reduces data entry to minutes, enabling clinicians to create detailed documentation that helps ensure data confidence, continuity of care, compliance, and revenue integrity.

Clinicians who use **ZOLL emsCharts NOW** mobile companion app can quickly and securely capture contemporaneous patient data on standard mobile devices.

Collaborative Care

RescueNet® Live telehealth software allows clinicians to remotely view real-time data from the X Series Advanced monitor/defibrillator screen via a cellular or WiFi connection.

Cloud-based **RescueNet 12-Lead** securely transmits 12-lead ECG data to hospitals, facilitating quick STEMI verification.

QA/QI

RescueNet CaseReview provides a snapshot of all the data captured during an event to support quality assurance initiatives and education.

Billing

ZOLL Billing is a cloud-based EMS software that streamlines the billing and claims process to increase productivity, reduce denials, and maximize revenue.

One call, one team, **one ZOLL**
