

Education & Training

Crystal Reports and SQL One-On-One Training for RescueNet Reporting

Do you have vital Crystal Reports or SQL questions that need answers right away? Do you need urgent help with the report you're writing? What if you want to modify one of your current reports or you require a new selector added to a report?

If you answered yes to any of these questions or just need some general help with Crystal Reports, ZOLL Data Systems now offers one-on-one online Crystal Reports assistance and training. This program allows you to buy as little or as much time as you need to help you write or modify your own Crystal Reports.

Schedule One-on-One Online Crystal Reports Training to answer your questions today!

Audience

- RescueNet Administrators and Power Users
- Any Crystal Report Users (RescueNet Dispatch, Billing, ePCR, and FRMS)

Prerequisites

- Working knowledge of Windows and Windows-based applications.
- Basic knowledge of database concepts such as tables, fields and records is highly recommended.
